

GENERAL NOTES:

- When using a template for set out prior to excavation, mark perimeter line 2" outside plastic edge.
- All measurements for dig depths are from the centreline to the outside of the coping.
- All seat ledges should be cut at least 2' 3" from finished pool height and 6" narrower than shell dimensions.

INSTALLATION CONSIDERATIONS :

- Dig seat depth down 2' 7" from finished height of pool coping x 1' wide.
- Level four corners upon placement.
- Backfill and fill to the foot ledge, pay particular attention to vertical movement of walls whilst backfilling. It is easily pushed in or out with the weight of the materials.
